

A COMPLETE CONTRACT PACKAGING SERVICE

Millmount Healthcare assist Pharmaceutical Company with their requirement for packaging services

MILLMOUNT
HEALTHCARE □□□

Challenge

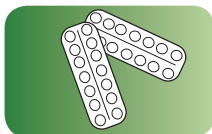

An Irish Pharmaceutical Company had a requirement for the contract packaging of an OTC pharmaceutical product. The product needed to be shipped into Ireland from outside the EU in bulk format, blister packaged and a leaflet was to be inserted into cartons. This product was then required to be QP released to market from Ireland directly.

The contract packaging company who normally work for this pharmaceutical company were at full capacity and therefore unable to do the work. Additionally, as this product was manufactured outside the EU, there was a requirement to audit the manufacturer's site. The pharmaceutical company needed to find an alternative solution and quickly.

Solution

Millmount Healthcare were approached by the Pharmaceutical Company to identify whether they would have the ability, capacity and availability to package this product.

Result

Following a successful audit of the manufacturer's facilities carried out by Millmount Healthcare, they arranged to have the product shipped directed to their facility in their CityNorth Business Park, Stamullen, only 30 minutes from Ireland's International Port. Customs clearance was organised by Millmount Healthcare in the interim along with procurement of artwork and tooling. Sampling took place in one of their licenced laboratories.

Within a short timeframe, Millmount Healthcare stepped up to the plate and delivered full primary packaging, auditing and QP release of product to market thus allowing this Pharmaceutical Company get their product to market within their tight timeframe.
