

### CONTRACT PACKAGING SERVICE FOR NON-EU PRODUCT

Millmount Healthcare assist Canadian Pharmaceutical Company with their requirement for packaging of their high-potent pharmaceutical product.

#### Challenge

A Canadian-owned pharmaceutical company had a requirement for contract packaging of a high-potent product. This generic pharmaceutical product, distributed in approximately 4,000 dosages, is exported to 115 countries. The pharmaceutical company were looking for a one-stop shop with facilities capable of packaging their high-value high-potent product and who were in a position to ship the finished packed product worldwide for ease of distribution.

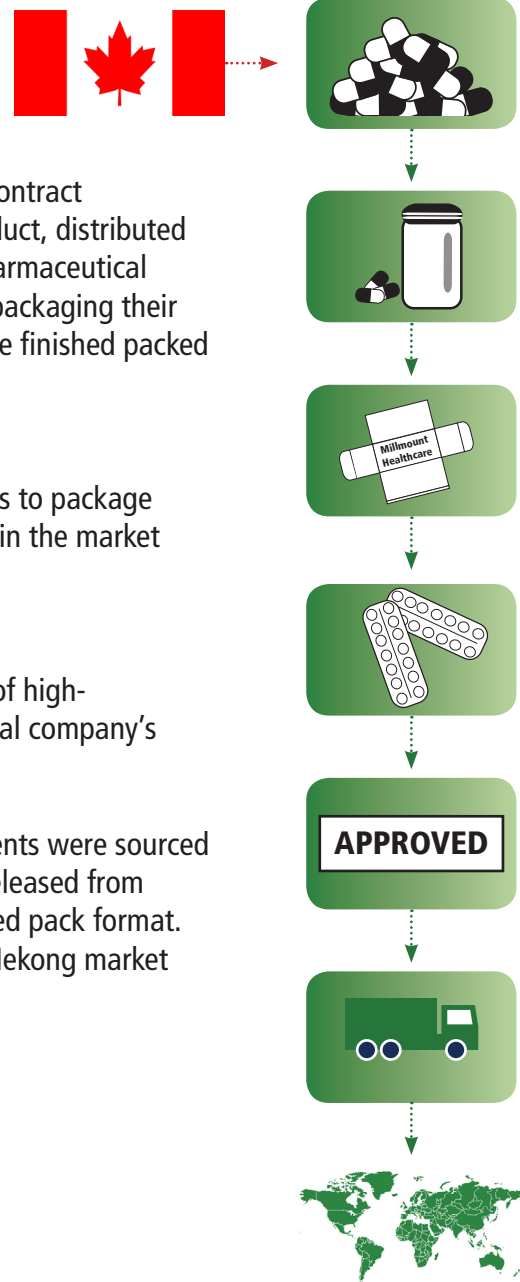

#### Solution

Millmount Healthcare, an established contract packer with capabilities to package potent products, were approached to ascertain their competitiveness in the market place, their capacity, location and suitability of facilities.

#### Result

Millmount Healthcare's facility which specialises in small-series runs of high-potent product was the perfect match for the Canadian pharmaceutical company's requirements.

The product was shipped in bulk from Canada to Ireland, all components were sourced locally, packaged in Millmount Healthcare's high-potent facility, QP released from packaging by Millmount Healthcare and returned to Canada in finished pack format. This arrangement expanded in time to facilitate the Australian and Mekong market needs.
